GPS

If you are looking for the best directions and the fastest way to Get Green, Maurice is your GPS-- **Green Product Source**. One call can get you an EPA Energy Star Benchmark Building Rating, an audit of existing energy and suggestions of how and when to upgrade to save money.

Pricing -- OUCH! Too much too fast is what we are hearing. Just like at the gas pump we can't keep up. [Click here to see the latest.](#)

Summer is here. Be safe and have fun this summer.

Thank you for your business!

Sincerely,

Liz Lauer
Marketing Manager

Take the Pledge!

Maurice Electrical Supply has made a commitment to do our part to save energy and help protect our environment. With your help, we can do even more. Be part of our team and [Pledge](#) to make your next light one that's earned the government's ENERGY STAR® for excellence in energy efficiency. The Pledge is a simple, but vital method of getting more people like you to commit to reducing greenhouse gases and saving energy resources, one light at a time.

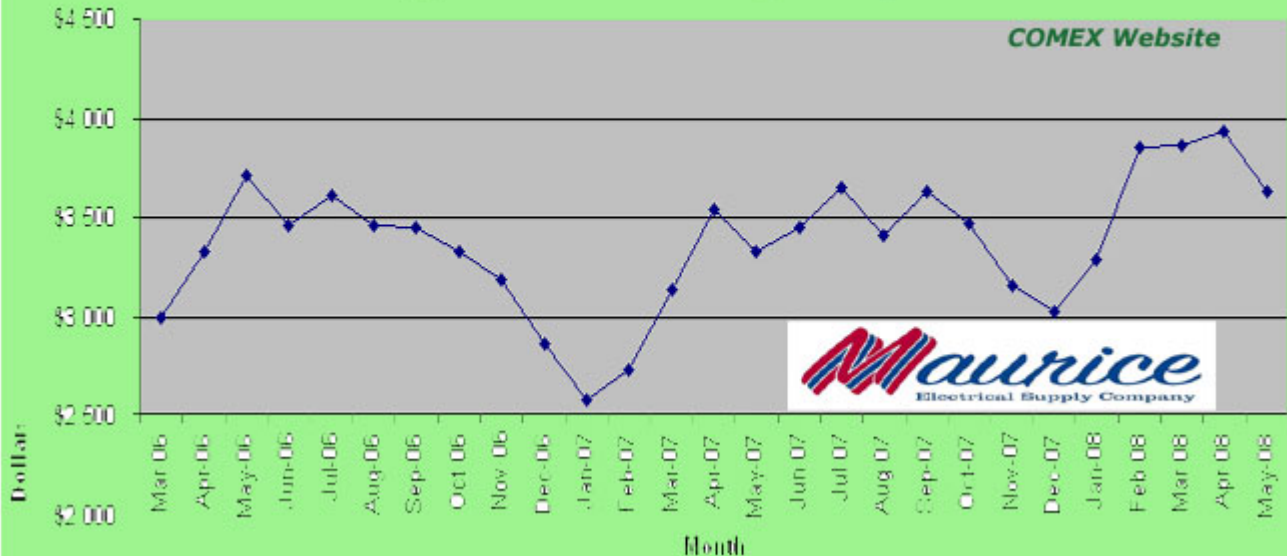

Our goal is to get 1,000 people to Pledge to change at least one light at home. Just think, by reaching this goal we will be making a significant impact on our environment, reducing approximately 450,000 of greenhouse gas emissions and a significant amount of energy.

[Take the ENERGY STAR Change a Light Pledge today](#) and help us reach our goal! It's a small step that's already making a big difference.

Thank you for your support!

Dimming Saves Energy

Switch to a Lutron dimmer and start saving energy today!

Skylark® eco-dim™

- eco-dim feature immediately saves at least 15% energy
- designer style dimmer
- single pole and 3-way versions available
- use with standard wiring for easy, economical installation
- UL Listed; Lutron controls are rated at 120VAC, 60Hz unless otherwise noted.
- Dimmer is available in 7 gloss colors
- Available Now through select home centers, lighting showrooms, electrical distributors, and through

LUTRON

Skylark® eco-dim™

T8 ULTRAMAX ECO XL Lamp

imagination at work

Features:

- 28 Watt; 4' Fluorescent; Highly Energy Efficient
- Up to 44% reduction in wattage compared to T12 with nearly the same light output
- Saves energy
- Long 30,000 hours life @ 12 hours/start extends relamp cycle
- Up to 12% reduction in wattage; saves energy vs. standard T8's
- High Quality Color Rendering

PowerPlug Luminaire Disconnects

The IDEAL PowerPlug™ is the first push-in disconnect that fully meets both the new Canadian Electrical Code 30-308(4) and new National Electrical Code 410.73(G) for non-residential fluorescent luminaires with ballasts. Many existing disconnects are rated for stranded wire only and will not meet the installation requirements for solid ballast wire. The PowerPlug also offers innovative push-in technology on solid and stranded wire. This push-in feature does not require tools and enables quick connections, resulting in labor cost benefits. In addition, the simple two-piece device passes UL 2459 finger probe requirements, allowing ballast replacement while minimizing the risk of shock.

PowerPlug – the disconnect that is truly one of a kind.

watt watcher® 12 cell paralouver

2 lamp replacement for 3 lamp 18 cell parabolic

The Watt Watcher 12 cell Paralouver utilizes new ballast and lamp technology to significantly reduce energy consumption while providing normal light levels.

Design Features

- A single 2 lamp LPW provides 10% energy savings and 11% greater light output compared to a standard 3 lamp 18 cell T8 electronic parabolic.
- When used to light a space to the same illumination level, 2 lamp LPW luminaires provide 19% energy savings compared to standard 3

[More information](#)

lamp 18 cell T8 electronic parabolics.

- 10% fewer luminaires and 40% fewer lamps required to achieve equivalent illumination, reducing installation and maintenance costs.
- 20% longer lamp life for reduced relamping maintenance costs.
- Payback of additional cost (over standard parabolic) in less than one year.
- Shipped with high lumen output/high color rendering T8 lamps installed.
- Low iridescence anodized aluminum 12 cell louver standard.

A-Series Lighting Control Panel

Our A-Series Lighting Control Panel combines remote operated circuit breakers and a micro-processor based controller in our standard A-Series panels. Reducing energy costs by programming your lights to turn off during unoccupied periods. Saving space and installation costs by removing the need for mounting external control cabinets and wiring relays, contactors, and time clocks.

Features and Benefits

- **Open Protocol** System communicates via BACnet or Modbus RTU/TCP without the requirement of gateways.
- **16 Schedules** 7-day repeating schedule, 16 daily On/Off periods.
- **16 Lighting Zones** Group branch breakers to be controlled by schedules, manual inputs, or override commands.
- **Electronic Clock** Capabilities includes: Real Time Clock, Astronomical Clock, Leap Year, and Daylight Savings time adjustments.
- **Burn-hour tracking** Totalizing of run time on breaker loads.
- **Load Priority Management** Enables the user to set load shed levels on each breaker.
- **Event and Trend Logs** Generating logs of alarms and status changes.

Maestro IR™ - Remote Control Dimmer

- Remote-controlled dimming
- One touch scene memory button
- Full-range dimming possible from up to ten locations

- LEDs show preset light level when product is off
- Lights fade up and down smoothly allowing your eyes to adjust to changing light levels
- 10-60 second delayed fade-to-off (press & hold switch) lets you leave the room before lights go out
- Standard 3-way wiring for easy installation and retrofit
- Power failure memory - it remembers your settings even after a power interruption
- Superior RFI suppression [More Information](#)

GE Energy Smart™ Compact Fluorescent (CFL) Bulbs

Save money.

Save \$36-\$59 on energy bills over the life of the bulb.

Save energy.

Use up to 75% less energy - and using less energy means less pollution is generated.

Simply by replacing a standard bulb with a GE Energy Smart™ bulb, you'll be able to put more money back in your pocket, while lowering energy costs and helping the environment. These bulbs last 8-10 times longer than standard bulbs - perfect for hard-to-reach places.
