**WEEC 2008
World Energy Engineering Congress and EXPO**

Don't miss the opportunity to see this conference in Washington, DC this year, October 1-3, 2008 at Gaylord National Resort. Learn about Energy Star, LEED, and Green, Sustainable and Alternative Energy. Come visit Maurice at our booth # 923/925 located on the Green Street Aisle. Call Liz Lauer at 202-675-9444 for your complimentary ticket to the expo.

Contractors: We are taking registrations for our 4th Better Business Boot Camp November 18 – 20, 2008. Space is limited and we are filling up. This class teaches contractors how to make money by running your business by cash flow. Don't miss this opportunity for training. [Click here for more information.](#)

Property Managers: It's best to start at the beginning, and the beginning is getting Maurice to help you determine your Energy Star Building Rating. From there we can guide you toward as much as a 30% savings on your energy bill. Call today to arrange for an Energy Audit of your building. 202-675-9400, ask for either Christin Spisak or Melissa Joswick.

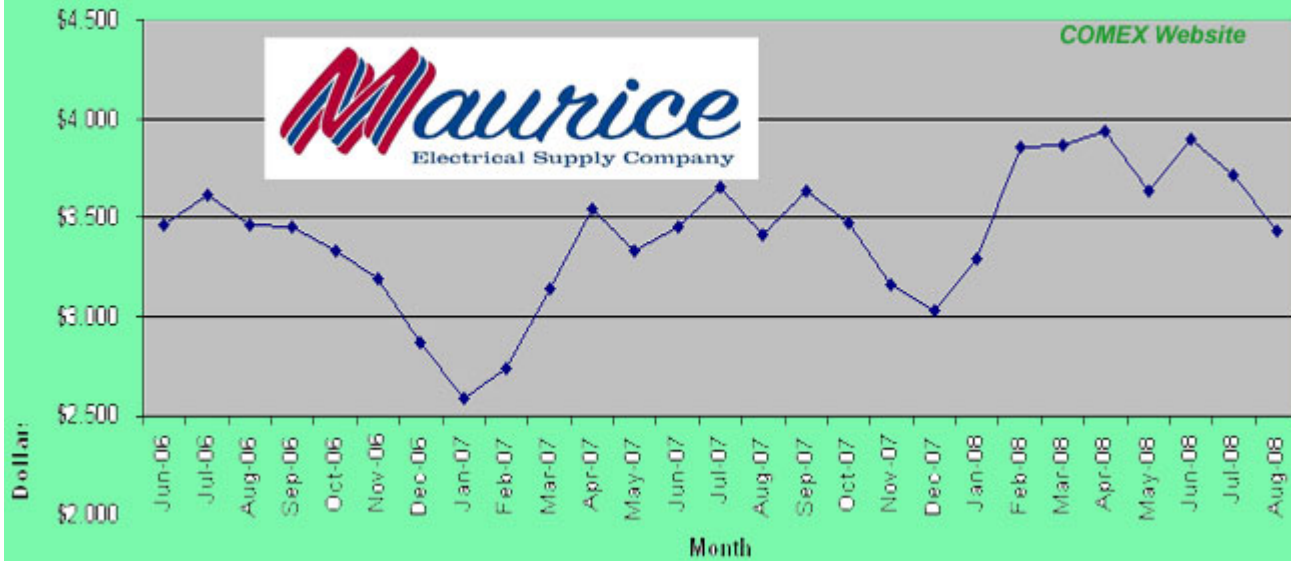

ConsensusDOCS: Contract documents are changing with the introduction of ConsensusDOCS. Maurice Electrical Supply endorses and promotes the use of construction documents written by consensus for the good of the job. We are actively working with NAED, the National Association of Electrical Distributors, to write purchasing agreements that coordinate with all of the construction documents in ConsensusDOCS. [Click here to read more.](#) If you would like to discuss the terms and conditions of purchasing further, please call 202-675-9400 and ask for Warren Janes.

Thank you for your business!

Sincerely,
Liz Lauer
Marketing Manager

Washington DC; September 11, 2008 – Maurice Electrical Supply Company Inc. is very excited to announce that it is being acquired by US Electrical Services, Inc. (USES).

Copper Prices Through August 2008

T5 High Efficiency Watt-Miser Lamps

Features:

- Save 5% on wattage by lamp type
- Same light output as standard T5 lamps
- Ideal solution for indirect lighting applications
- Compatible with existing T5 ballasts; maximize savings using GE UltraStart T5 ballasts
- 25,000 hour rated life
- Environmentally conscious: TCLP compliant
- All lamps offered in the following colors: 3000K/3500K/4100K/5000K/6500K

[More Information](#)

A-Series Lighting Control Panel

Our A-Series Lighting Control Panel combines remote operated circuit breakers and a micro-processor based controller in our standard A-Series panels. Reducing energy costs by programming your lights to turn off during unoccupied periods. Saving space and installation costs by removing the need for mounting external control cabinets and wiring relays, contactors, and time clocks.

Features and Benefits

- **Open Protocol** System communicates via BACnet or Modbus RTU/TCP without the requirement of gateways.
- **16 Schedules** 7-day repeating schedule, 16 daily On/Off periods.
- **16 Lighting Zones** Group branch breakers to be controlled by schedules, manual inputs, or override commands.
- **Electronic Clock** Capabilities includes: Real Time Clock, Astronomical Clock, Leap Year, and Daylight Savings time adjustments.
- **Burn-hour tracking** Totalizing of run time on breaker loads.
- **Load Priority Management** Enables the user to set load shed levels on each breaker.
- **Event and Trend Logs** Generating logs of alarms and status changes.

[More Information](#)

SureTest® Circuit Analyzer

- Arc Fault Tester
- Tests AFCI receptacles for proper operation
- Tests for shared neutrals
- High accuracies
- Measures voltage drop under full load (12A, 15A, 20A load tests)
- Hot and neutral conductor impedances
- Identifies proper wiring in 3-wire receptacles
- Identifies false (bootleg) grounds
- Tests GFCIs and EPDs for proper operation
- Conducts testing without disturbing sensitive loads
- Verified isolated grounds (with 61-176 adapter)

[More Information](#)

eco-dim™ dimmers

eco-dim guarantees at least 15% energy savings compared to standard switches

[More Information](#)

- Eco-dim dimmers extend bulb life over 3x as compared to standard switches
- All eco-dim models work in single-pole and multi-location (with Maestro companion dimmers) applications
- Available in Maestro®, Diva®, Skylark®, Ariadni®, and Rotary families

Each year Lutron products save as much energy in North America as 2,000 windmills produce. That's enough clean energy to produce lighting for 4.5 million households.
